

NOTES

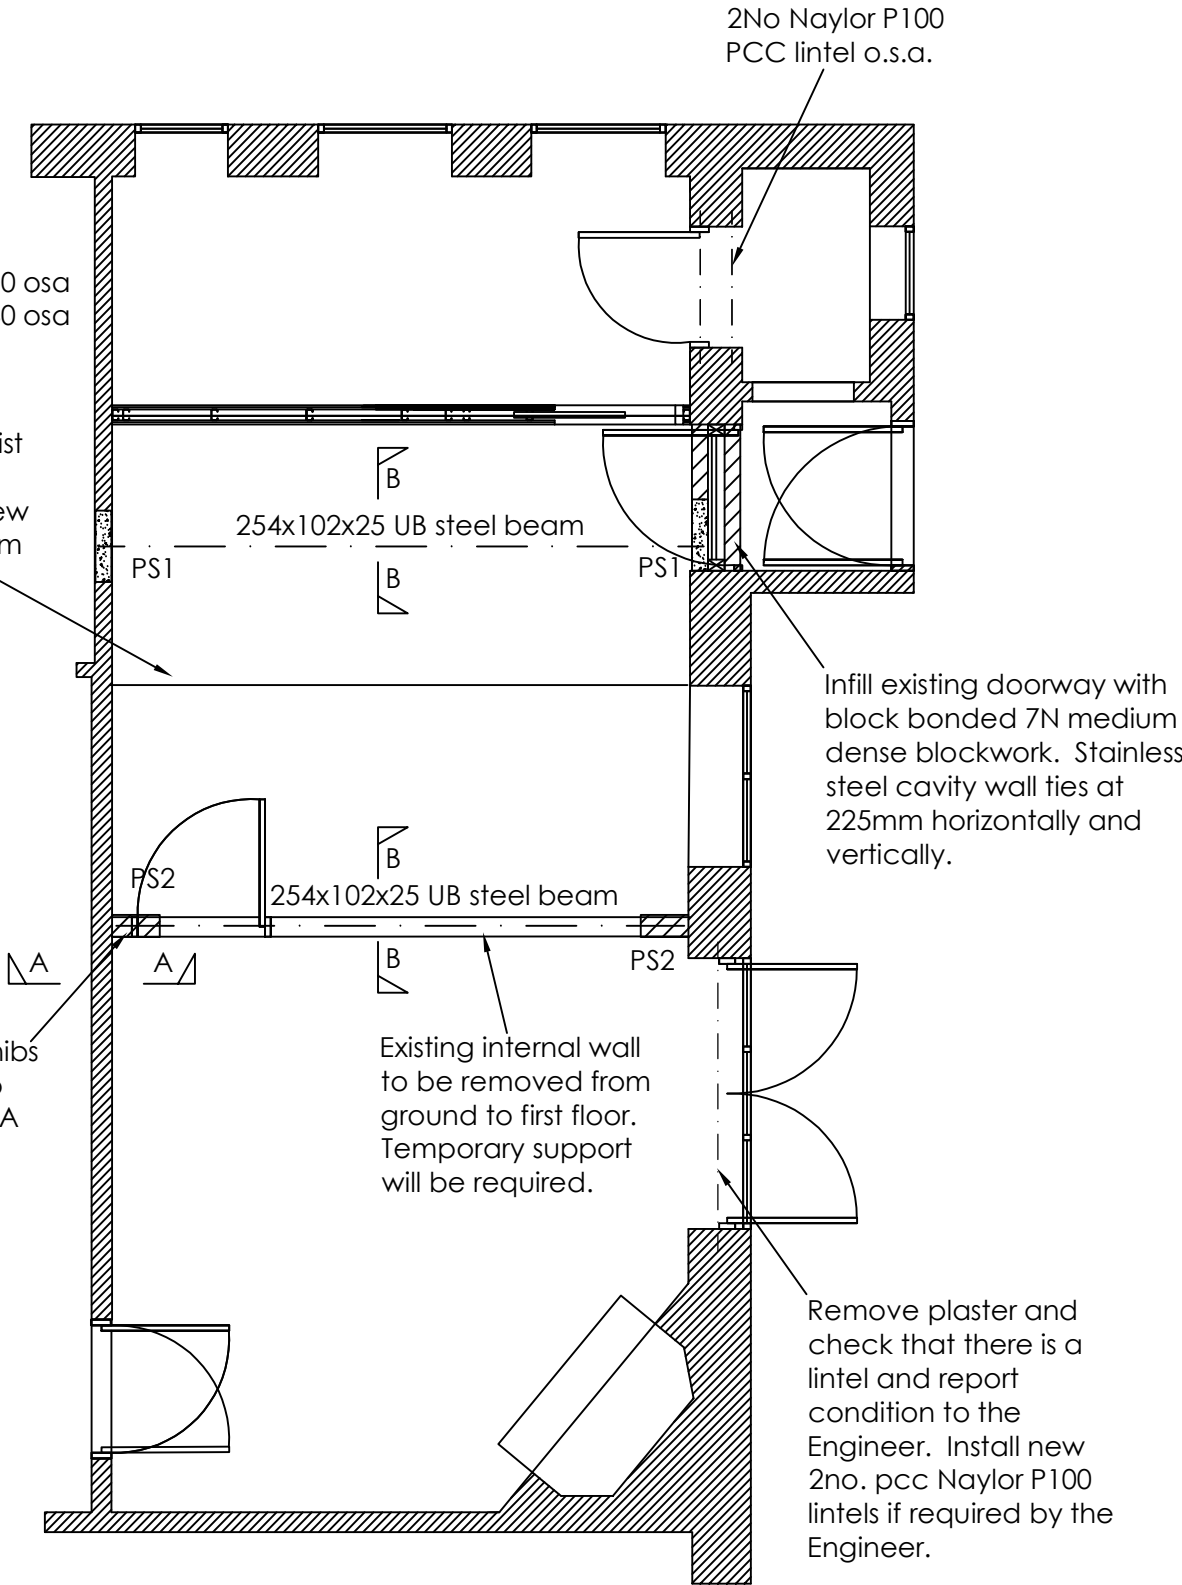

1. All dimensions shall be confirmed on site prior to fabrication of steel.
2. Steelwork shall be grade S355 JR.
3. Steel to be blast cleaned to BSEN ISO 850-1 and preparation grade Sa2.5.
4. Steelwork to be painted with Zinc phosphate primer 80 microns thick.
5. Temporary support is required until new beams are in position and packed tightly to underside of partitions. Engineering brickwork or dense block and dry pack shall be used as packing.
6. Temporary support to be designed by the contractor.
7. Mortar shall be class (iii) (M4) to BS5628.

PS1 - Naylor Padstone 450x215x100 osa
PS2 - Naylor Padstone 300x215x140 osa

PS1 - Naylor Padstone 450x215x100 osa
PS2 - Naylor Padstone 450x215x140 osa

Break out ceiling and report the joist size and spacing to the Engineer.
Check that joists span between new steel beams. Remove timber beam when instructed by the Engineer.

Install new 300x140 blockwork nibs (10N/mm² dense blocks) tied to existing wall with Ancon Staifix A system (see section A-A)
